Enduristan cannot be found on any map, but when the daily grind is left behind and the adventure begins, that is when you realize you are there. When we travel through Enduristan the horizon is clear, the colors are bright, life feels good and we are free.

We, at Enduristan, engineer and manufacture first class motorcycle luggage. For us, off-road traveling has been a fixed part of our lives for years and all our developments are based on this rich pool of experience.

No matter if you are crossing the Sahara, riding in Siberia or rushing down Gunbarrel Highway in the remote Australian outback, Enduristan luggage is your ideal companion. Innovative details and top quality designs ensure our products are always ready for your adventure.

Safe Travels
David, Christoph and Isabel
Founders of Enduristan, Switzerland
No matter if you go on a day trip or want to explore the ancient town of Bukhara during your trip around the world, the Hurricane Rucksack is your ideal companion to keep your most important items handy and safe.
100% Waterproof
As with all Enduristan products, the Hurricane Rucksacks are 100% water, mud, snow and dust proof. The zipper is a special waterproof design and all seams are welded.

NO MATTER THE WEATHER

Harness
The Enduristan Harness gives you the freedom of movement you need wherever you ride. It fits perfectly with or without your motorcycle jacket and thanks to its padded and fully adjustable belts you will be comfortable when maneuvering in all situations.

FULL TANK

Bottle Pouches
For ease of access, you’re able to quickly stash away soft drinks or even an extra bottle of fuel for a longer trip by using the two stow-away bottle pouches on your hurricane rucksacks.

FREEDOM OF MOVEMENT

EVERYDAY ADVENTURES
Our waterproof day pack lets you carry all your needs for your daily adventures or as additional luggage for long distance travels. It fits perfectly with or without your motorcycle jacket and has an all welded construction for 100% waterproofness. Manufactured from incredibly durable fabric, the Hurricane 15 is always ready for any adventure.

- 2 stow-away bottle pouches
- Velcro section for individual patches
- Additional strap to attach an XS Base Pack
- Reflective prints for better visibility (front and back)
- Inside padded sleeve for tablet
- Inside mesh pocket
- Inside document pouch with pen holders, zipper pocket and keyring
- Washable and easy to clean
- Built to last

Hurricane 15 with compression straps and elasticated net storage

TECHNICAL DETAILS
Volume: 15 Liters
Dimensions: 43 x 25 x 15 cm
Weight: approx. 1.28kg
The Hurricane 25 is not just comfortable due to its fully adjustable padded harness and hip belt but also fully waterproof and ample big enough to take everything you need with you. With features including a special zipper pocket for your sunglasses at the top and a zipper pocket for your – sometimes dirty – tools on the bottom everything can be organized and quickly accessed. Naturally, our Tool Pack fits this pocket perfectly too.

**HURRICANE 25 FEATURES**
- Fully adjustable padded harness
- Adjustable padded hip belt with straps for Add Packs
- Waterproof outside zipper pocket for glasses and other small items
- Waterproof outside zipper pocket for tools
- Outside heavy-duty mesh pocket with velcro lock
- Elastomeric net storage
- Cargo loops to attach additional gear
- Secret pocket
- Separate pocket for 3 liters Hydrapak®
- 4 compression straps
- 2 stow-away bottle pouches
- Velcro section for individual patches
- Additional strap to attach a XS Base Pack
- Reflective prints for better visibility (front and back)
- Inside padded sleeve for small laptop or tablet
- Inside mesh pocket
- Inside document pouch with pen holders, zipper pocket and key ring
- Washable and easy to clean
- Built to last

**TECHNICAL DETAILS**
- Volume: 25 Liters
- Dimensions: approx. 52 x 30 x 16cm
- Weight: 1.82kg
The Add Pack S is perfect for all your small items you need fast access to. Just buckle up the Add Pack on the harness of your Hurricane Rucksack or on other Enduristan Products like the Monsoon 2 or the Blizzards. Like the other products form Enduristan this one is waterproof as well.

**ADD PACK S**

**FEATURES**
- Interface to attach on other Enduristan products like the Hurricane
- Rucksack, the Blizzards, the Monsoon 2 and many others
- Compatible with almost any 25mm strap
- Waterproof
- Built to last

**TECHNICAL DETAILS**
- Dimensions: 14 x 10 x 4cm
- Volume: 0.6 Liters

If you want to transport some small things separate to your big luggage the Add Pack L is your perfect choice. It has enough space to transport small items like your mobile phone, your camera, your wallet or your pocket knife. It fits perfect on the hip belt from our Hurricane Rucksacks or other luggage from us like the Monsoon 2 or the Blizzards.

**ADD PACK L**

**NEW PACK FEATURES**
- Interface to attach on other Enduristan products like the Hurricane Rucksack, the Blizzards, the Monsoon 2 and many others
- Compatible with almost any 25mm strap
- Waterproof
- Built to last

**TECHNICAL DETAILS**
- Dimensions: 15 x 14 x 6cm
- Volume: 1 Liter
In Enduristan life is sometimes hard: the bush extends onto the track, the creeks are precariously deep and not every slip-up can be avoided. This is all good though if your luggage can endure these adventures just as the Enduristan Saddlebags can do!

After a day riding in apocalyptic downpours you will be sure to enjoy discovering some dry clothes nestled within your Blizzard Saddle Bags or Monsoon 3 Panniers.
Blizzard Saddle Bags

Adapt it to your needs
You do not carry the same stuff if you are out for a tough weekend in the mountains with your hard enduro or if you are on a leisure trip with your touring bike, right? That’s why we choose a modular approach for the Blizzard Saddle Bags.

On the underside of your Blizzard Saddle Bags, the two compression straps can easily be converted into an interface to attach a Bottle Holster or a Fender Bag (size M or L only). Like this you can add 2 x 1.5 liters of additional volume, 2 x 1 liters of fuel or a combination of both.

On top of the Blizzard Saddle Bags, there are placements to attach two more Bottle Holsters to increase the range of your hard enduro.

The rear of your bike remains free to attach a Tornado 2 Pack Sack. If you are planning on going out into the wild, you can chose a Rally Pack or any XS Base Pack, in order not to limit your freedom of movement.

Technical Details
Blizzard Saddle Bags
- Volume: (S) 12 Liters, (M) 17 Liters, (L) 24 Liters
- Dimensions (S): approx. 36 x 24 x 9cm (per bag)
- Dimensions (M): approx. 30 x 24 x 12.5cm (per bag)
- Dimensions (L): approx. 30 x 24 x 18cm (per bag)
- Weight: approx. 1.5kg (complete set)

Made for the beaten tracks
The Blizzard Saddle Bags feature an innovative shape, which does not restrict your movement whilst riding off road. If you lean to the rear during steep descents, the bags will not interfere with your calves. The bags will not get entangled in the scrub, since there are no unnecessary straps on the outside of the bags. Last but not least, they are made of our extremely durable 3-layer fabric, all straps are double stitched and the front straps’ buckles are good for up to 225kg.

Saving weight taken seriously
Let’s face it: It’s no use to buy an expensive new carbon muffler just because it is a few kilos lighter than the original one and then attach heavy steel pannier frames and jeopardize the weight gain completely. The Blizzard Saddle Bags do not require any racks. Just make sure you load the heavier items on the non-exhaust side (where there is only one exhaust) and use an Inferno Heat Shield if required.

No racks required
- Does not require rack
- Fits any enduro or adventure bike
- Red inner lining for high visibility
- 4 compression straps per bag
- 2 rows of cargo loops to attach additional gear
- 4 interfaces to attach Bottle Holsters
- 2 interfaces to attach Fender Bags (size M and L only)
- Ergonomic soft grip handles

Enduristan 4 Layer Protection:

Wear Protection: The outermost layer of the 3-layer fabric is made up of heavy duty polymer which acts as superior wear protection. With an all-welded design it makes the Monsoon 3 even tougher.

Tear protection: The middle layer consists of 1000D Nylon mesh which is densely woven yet flexible to allow the 1000D Nylon filaments to align in the direction of the stress.

Water protection: The innermost layer of the 3-layer fabric is made out of a red polymer for perfect visibility and is 100% waterproof. Unlike hard panniers, the rolltop closure does not permanently bend in the case of a crash, keeping your items fully waterproofed.

Impact Protection: At the front, underneath and at the rear we have added a high impact plastic to protect the contents of your bags from loose gravel and surprise branches.

Enduristan Monsoon 3 - 4 Layer protection system.

Enduristan Monsoon 3 Saddle Bags are 100% waterproof, mud, snow and dust proof. Even if your bags are busting the Enduristan roll top helps you neatly close them without hassle or fuss. Simply overlap the two plastic strips over one another and roll.

EXPLORING THE WORLD

Secure Positioning

Monsoon 3 fits many adventure bikes without the addition of pannier frames, thus keeping the bike narrow and the weight close to the center. With elasticated ROKstraps the bags remain safely in place even under the most extreme off-road riding conditions. For bikes without a rear farring, a frame mount kit is separately available.

NO RIVER TOO DEEP

Waterproof

With an all-welded design, waterproof 3-layer fabric and rolltop closure the Monsoon 3 Saddle Bags are 100% water, mud, snow and dust proof. Even if your bags are busting the Enduristan roll top helps you neatly close them without hassle or fuss. Simply overlap the two plastic strips over one another and roll.

Enduristan Monsoon 3 attached to pannier rack BMW 1200 GS.

STRENGTH WHEN YOU NEED IT

- Red nylon liner for high visibility
- 2 fold-away separators per bag
- Holds up to 6 isolation bags
- 2 rows of cargo loops per bag
- Soft grip handles
- 3 compression straps per bag

The Enduristan Pannier Toppers fit most brands of aluminum panniers, such as Touratech, SW Motech or GlobeScout. The distance between the tie-down straps is 24.5 cm (center-to-center).

COMPATIBLE TO MOST PANNIERS

PROTECTING YOUR GEAR

Like all Enduristan gear, the Pannier Toppers are completely welded. The zipper is covered on the inside just like the design of the Sandstorm Tankbags. Thus you enjoy 100% waterproof pannier toppers without fiddling around with rain covers or additional dry bags.

WATERPROOF YET FAST TO OPEN

A Place For Everything

We hate searching our bags for lost items. This is why the Pannier Toppers have three inside pockets and numerous elastic holding loops to use for smaller items, which otherwise can easily get lost. The organizer is flat, so it’s not in your way if unused.

STORAGE AT ITS BEST

- Red inner liner for high visibility
- Outside heavy duty mesh pocket with Velcro lock
- Elastic netting storage
- Cargo loops to attach additional gear
- 4 hook straps for secure attachment to aluminum pannier
- Large reflecting logo on front and backside for maximum visibility
- Heavy duty zipper
- Large zipper pocket under cover
- 2 Mesh pockets under cover with Velcro lock
- 20 elastic holding loops for small items
- 2 D-rings on the outside to connect a shoulder strap (separately available)
- Softgrip handle

Large (15 Liters)
Dimensions: 40 x 26 x 15 cm
When traveling we always desired a well thought out enduro tankbag which was rock-solid seated yet easy to remove. Apart from that, it should be made of the most robust zippers and top quality materials. Sadly, we could not find one.

That is why we founded Enduristan back in 2008 to make one ourselves. In the course of doing this we invented the Expandable Volume Technology to give you the freedom to adjust your tankbag to any desirable volume without restrictions. Today we are proud to offer you the Sandstorm 3 line which marks the latest development step of our legendary Sandstorm Tankbags.
Waterproof
With Waterproof 3-layer fabric, a zipper covered on the rear and an all welded design the Sandstorm's main compartment remains 100% waterproof. You do not require any rain cover and there is no inner bag you additionally need to open. The side pockets are also protected by water repellent zippers.

Expandable Volume Technology
Thanks to our patented Expandable Volume Technology, the tankbag's volume is fully adjustable to any required size.

Protection
If you go on extreme trips, this is the tankbag for you. While the Sandstorm 4X protects your most essential items from water and dust, it keeps a low profile and doesn’t get in your way under even the most extreme offroad riding.

Volume: 3.5 Liters
Dimensions: 20 x 15 x 10.5cm
Weight: approx. 0.7kg

- Soft, unreinforced design, no “nutter-effect”
- Low profile to keep out of the way
- Waterproof map pocket (20 x 15 cm)
- Red inner liner for high visibility
- Waterproof cable ducts to main compartment and map pocket

- Dimension: approx. 26 x 12 x 5cm

---

The Fender Bag can be attached to the underside of the Blizzard Saddle Bags (size M or L)
Every adventure demands good preparation. With a well-assorted and perfectly organized tool kit you have best chances to handle any mechanical problem you may face during your ride into the wild.

We all know the situation: As soon as we carefully lay down that screw on the ground it gets lost in the gravel. That is why Enduristan’s Tool Roll unfolds to a large and red lay down area to keep your dismounted parts organized and well in sight. One part of it even is magnetic to make sure your stuff stays where you want it to.

When you need your tools, you often need them quick. The Tool Roll’s red pull strap with the printed spanner stands out well from your other belongings.

- 56 elastic loops
- 2 rubber tool bit holders
- 2 large areas for dismounted parts
- Additional magnetic area
- Open inside pocket
- Zipper mesh pocket for small items
- Red inner lining for high visibility
- Secure velcro closing
- Outside pull strap with spanner logo for fast recognition and access

Tools are not included

When we started Enduristan, we wanted the toughest buckles money can buy. So we reached out for the most esteemed manufacturers and asked them for their strongest buckles. We then purchased a few hundred of each suggestion and pit them against each other. Destructive testing is the only way to find the limits of a buckle, and we did so without mercy. After pulling almost 1,000 buckles to pieces - some at freezing -20°C, some at blazing 50°C - we had our winner. Today, the experience of thousands of Enduristan customers confirm that we made the right choice.

After using them for years on all our products, we have had regular requests to sell them separately so users can modify third party soft luggage or replace other buckles with our top quality type.

Enduristan’s luggage is made of the toughest materials on the market and manufacturing quality is second to none. However, if you happen to crash, your luggage may suffer some damage. Our new Luggage Repair Kit contains all you need to fix minor damages in the field.

Content:
- 8 pieces of fabric
- 2 male adjustable buckles
- 1 female adjustable buckle
- 1 surface mount buckle
- 1m of 25mm strap
- High tensile repair thread
- Sewing needles

- ⬤: Fits only if the stock luggage rack is removed
- ■: Fits only if the pilot’s handles are removed

Our products fit many more current or outdated models. If you are unsure, just get in touch with us.
Our new 3-layer fabric is a supreme high-tech product. The outer layer of extremely abrasion resistant polymer protects your belongings whilst the inner layer is made of high visibility red vinyl. In between a 1000D Nylon mesh is embedded. The mesh is densely woven yet flexible to allow the 1000D Nylon filaments to align in the direction of the stress for maximum tear resistance.

420D Nylon is used for the isolation bags where the core focus is flexibility and minimal weight. To make the bags waterproof, oil and fuel resistant, the fabric is double-side coated with environmentally friendly TPU.

The products with this icon are 100% mud, snow and dust proof due to TPU-laminated fabrics, all-welded construction and water-repellent zippers.

ROKstraps are heavy duty stretch straps invented in Australia. The core is 100% natural rubber for optimum elasticity and tear resistance above 100kg. It is protected by a polyester braiding for superior UV and wear resistance.

We only use YKK’s most robust coil zippers. Coil zippers are simply the best solution if you have to deal with sand and dust. The Tankbag’s main zippers are an impressive size 8, whilst the side pockets and Belt Packs are fitted with hefty size 5 zippers.

Exhaust systems can get as hot as 650°C (1200°F). Only a small distance between the muffler and luggage is enough to let the heat dissipate. Additionally, the forced convention of the airflow will further improve the cooling capacity.

Thought-out functionality, attractive design and ergonomics are key to outstanding products. The Swiss product development office Flink is known for innovative solutions and was awarded with numerous international design awards - that’s why we develop our products together with Flink.
